(See inside Cover)

WHOLESALE

Compton's DAHLIA FARM
BORING, OREGON

To Our Customers:

To insure your satisfaction and that of your customers we take pride in selecting only choice tubers for your order. Each tuber is individually inspected just prior to shipping and is carefully packed to insure satisfactory delivery.

GUARANTEE

We guarantee our dahlia tubers to be true to name and of highest quality. If stock is not completely satisfactory when received, return same at once and your money will be promptly refunded. We want you to be completely satisfied and if for some reason you do have a complaint please advise us within 10 days of receipt of shipment.

COLOR ILLUSTRATIONS

We have a limited selection of color prints available and these will be shipped with orders free. Kodachrome duplicate transparencies are available at our cost of 15c each. We try to maintain a full selection to match all varieties listed. Available with orders only.

STORAGE

Our dahlia clumps are washed clean and separated at digging time. Ventilated storage is held a near constant 50 degrees F. Fungicides are used to control damaging molds.

CULTURE

Culture varies with locality but a few things are constant in all areas. Plant dahlia tubers about 5 inches deep and horizontal in area of near full sunlight. Water heavily at planting time and thereafter as needed for optimum growth. Pinching the top terminal shoot from dahlia plant after four sets of leaves have developed will cause branching and development of more and better quality blooms without staking.

WHEN ORDER ARRIVES

If freezing weather prevails along the shipping route it is a good idea to check your shipment at once for frost damage. If damage is evident contact your carrier agency at once and advise us of their decision. Present your invoice and carrier bill of lading to them for any claims. We ship by insured carriers and any claim for damage en route must be submitted to them. Store your dahlias in a cool dry place that has good ventilation. It is important to keep the tubers stored in their Polyethelen bags and packing media to eliminate shriveling. When displaying the tubers for sale, display only a moderate number and keep the main supply covered.

DISPLAYING THE TUBERS

Eyes will be evident on all tubers but often times the layman will not recognize the dormant eye. Use slightly damp peatmoss on the tubers displayed to stimulate sprout growth. A green sprout is worth a million words and adds much sales appeal. *If sprouts breakoff or become too long and must be cut off, a new one will develop in the same terminal.* Moist, growing tubers will sell four to one over the dry dormant stock. Do not display the tubers near a heat unit or in the sunlight.

TERMS AND CONDITIONS OF SALE

Prices are all F.O.B. Gresham, Oregon. New accounts please send cash with order. Net thirty days. No charge for packing materials or shipping containers. We ship via Express or Auto Freight unless otherwise instructed. We ship in lightweight wirebound or cardboard containers. If delivery by parcel post is desired please include sufficient postage with your remittance. Excess postage will be refunded.

COMPTON'S DAHLIA FARM

Large Decorative Dahlias

FD—FORMAL DECORATIVE—Double flowers, full to the center, usually with flat petals, often rounded at the tips, and regular in arrangement.
ID—INFORMAL DECORATIVE—Double flowers, full to the center, usually with long twisted petals, and often irregular in arrangement.

The large decorative type dahlias are the most popular and are available in most every color and blend but blue and a true black. Sizes under this heading range from six to 14 inches in diameter.
